REASONS FOR ALLOWANCE

1. This Office Action is responsive to the Amendment filed on 8/17/05.
2. Claims 1 and 3-24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

References 6389091, 6788754 and 5771264 are additionally cited because they are pertinent to the claimed invention.

-Regarding to independent claim 1, none of prior art of record teaches or suggests a system as claimed. Suzuki (6,353,648), previously cited, teaches the claimed system except that he fails to teach the limitation "said synchronized clock signal is received as a drive signal by an analog-to-digital converter which converts said data signal at a sampling frequency responsive to said synchronized clock signal". It would not have been obvious for one skilled in the art to implement Suzuki in view of other prior art of record for leading such the implementation to the claimed invention.

-Regarding to independent claim 11, none of prior art of record teaches or suggests a system as claimed wherein the system comprises a signal converter for converting a data signal at a sampling frequency responsive to a synchronized clock signal; a phase estimator for determining a phase error with respect to a remote clock signal and respect to a phase information associated with said data signal, and from thereto, issuing a correction signal for a local clock signal; and a clock modifier for applying a phase modifier, responsive to said issued correction signal, on to said local clock signal, and from thereto issuing a synchronized clock signal for said signal converter.

-Regarding to independent claims 19 and 23, none of prior art of record teaches or suggests a method and associated system as claimed wherein the method/system comprises procedures/devices of determining a number of clock jitters to be applied over a data frame of a time duration to synchronize a local clock signal with a remote clock signal; and applying said clock jitters to said local clock signal in an equal distribution spacing over said time duration and centered within a boundary of said data frame, wherein a time between clock jitters is equal to said time duration divide by said determined number of clock jitters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
